# Best Practices For Keeping Your Home Network Secure

## Synopsis

As a user with access to sensitive corporate or government information at work, you are at risk at home. In order to gain access to information typically housed on protected work networks, cyber adversaries may target you while you are operating on your less secure home network. Don't be a victim. You can help protect yourself, your family, and your organization by following some common sense guidelines and implementing a few simple mitigations on your home network.
